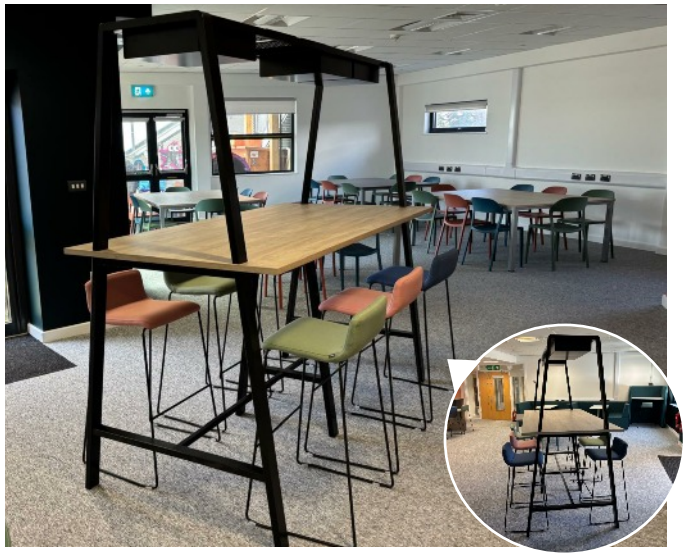
Case Study

Client: **Private Client**
Project: Educational Furniture Refurbishment
Project Value: Circa £57k
Project date: July 2026

Project Management Service including:
- Source, supply and delivery of educational furniture
- Space planning & design
- Risk Assessments & Method Statements
- Delivery schedule



Common Room: A-frame poseur height table with a over-frame canopy. Skid frame stools with upholstered seat & back pads, and a chrome frame.

Common Room: Poseur height, panel end bench with chrome skid frame stools including upholstered seat and back pad, and integrated footrest.

A Modern Furniture Transformation at a Bristol Secondary School.

A leading Multi-Academy Trust responsible for around 38 primary and secondary academies across England wanted to refresh a number of spaces within one of its secondary academies in Bristol.

As a trusted supplier on a national framework agreement, we were appointed to provide furniture and a complete project-managed service, helping the Trust achieve the right balance of quality, design, cost and service.

The project focused on a range of areas across the school, with each space requiring a different approach to suit how pupils and staff use it.

Our furniture was supplied across several key areas of the school, including; Library, Common Room, IT Room, Physics Rooms, Study Area, Art Rooms, and a Sixth Form Rooftop Area.

Rather than simply supplying furniture, we worked with the academy throughout the project to understand the requirements of each area and develop practical solutions that worked within the available spaces.

The result was a collection of modern; welcoming environments designed around the way pupils learn, study, socialise and spend time at school.

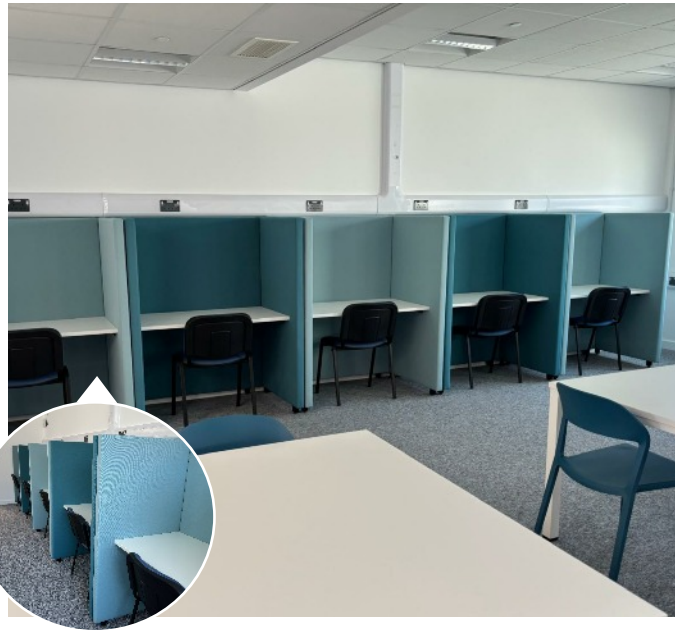
As part of our project-managed service, we handled the project from the early planning stages through to completion. This included detailed site surveys, space planning and design, followed by visuals and presentations to help the school and Trust see how the proposed spaces would look before making final decisions.

Once the designs were agreed, we coordinated the delivery and installation of the furniture, ensuring the project was managed through to completion.

The refurbishment has given the academy a more contemporary feel, while providing pupils with spaces that better reflect the different ways they use the school throughout the day. From focused study and independent learning in the library and quiet areas, to practical teaching in the physics and art rooms, the furniture was selected with the purpose of each space in mind.

The Sixth Form Rooftop Area also provided an opportunity to create something different, a more relaxed environment where older pupils can work, meet, and spend time away from the traditional classroom setting.

The completed project has received positive feedback from the framework team, Multi-Academy Trust and, most importantly, the pupils using the spaces every day.



Silent Study Area: Fully upholstered single panel booth with white laminated table top.

Silent Study Area: Fully upholstered, double seat pod unit with freestanding laptop tables with a melamine top and steel, powder coated base.

Common Room Area: Fully upholstered, four seat low back diner seating booth, c/w white laminate table with tubular steel upright base.

Common Room Area: Multipurpose table with post legs with stackable chairs with plastic seat and back.

Library: Post leg tables, 4 legged - polypropylene stacking chairs, and tall bookcase units supplied with 4 shelves and a 2mm PVC HD edging tape.

Sixth Form Rooftop: 8 Seater Round Picnic Tables made from sturdy timber and built to withstand heavy duty use. Rounded edges for added safety.

Head Office: Unit 1, Harvard Way, Harvard Industrial Estate, Kimbolton, Cambridgeshire. PE28 0NJ
